EDUCATION

- **2022-present**
ROYAL UNIVERSITY OF PHNOM PENH
 - currently year 3 student
- **2023 - 2024**
KILO IT
 - Intern Web front end

SKILLS

- React Js
- Redux
- Project Management (Trello & Click Up)
- Git (Git Lab & Git Hub)

LANGUAGES

- Khmer(Native)
- English (Good)

PROFILE

Hello, my name is Rith. I'm 20-year-old and I currently third-year computer science student at the Royal University of Phnom Penh. I had Internship on front end development using React js. I have built some project like static & dynamic website and also Integrate with API . I have self prepared about front-end programming, with a strong commitment to create responsive, user-friendly interfaces and improve user experience."

WORK EXPERIENCE

- **Kilo IT** NOV 2023 -JUNE 2024
Learning Web Front end ReactJs
 - Learning by Documents and guide from mentor then deep to practices by individual and with group
 - Learning Project Management and Source Control like Git (GitLab & GitHub)
 - making static website and dynamic website integrate with API
- **Kilo IT** June 2024 - Nov 2024
Intern Web Front end React Js
 - Collaborated with senior developers to develop and maintain web applications using React.js , Typescript & Redux .
 - Integrated third-party APIs to display dynamic content, including fetching and updating real-time data.
 - Utilized tools like Git for version control and collaboration, ensuring smooth workflow and project management.

RECENTLY PROJECT

- Static Template Website (HTML + CSS / Bootstrap)
- Dynamic Admin Ecommerce Integration with API (React Js & Redux)
- Dynamic Admin Booking Movie Management with Firebase (React & Redux)

CHHUN NATHARITH

Front end React Js

017 225 628
chhunnatharith@gmail.com

I'm expressing my interest in the Junior Web Developer (ReactJS) position at Edemy. As a third-year Computer Science student at the Royal University of Phnom Penh, I've built a solid foundation in web development, particularly in ReactJS, and I'm eager to apply my abilities to your aim of making education more accessible in Cambodia.

During my studies and internship as a front-end React.js developer, I obtained practical experience developing static, dynamic, and responsive web applications. I worked with React principles including components, props, state management (Redux), and lifecycle methods, as well as current JavaScript capabilities like ES6+. To deliver satisfactory user experiences, I have used RESTful APIs with Axios, Git version control, and CSS frameworks such as Bootstrap and Material-UI. I'm interested in learning more about front-end testing and accessibility standards because I only have some basic knowledge in that area.

As someone who loves technology and sharing knowledge, I feel my experience and commitment to grow is fit for your business. I appreciate your work with the Tesdopi app and the impact it has had on almost 300,000 high school students.

I am convinced that my experience with React development, as well as my strong teamwork and problem-solving abilities, will make me a useful addition to your team.

Thank you for considering my application. I'm looking forward to the opportunity to discuss this role further.

Sincerely,
Chhun Natharith
